

ABS CEO Alejandro Pardiñas Joins FIU's National Industrial Advisory Board

Atlantic Bearing Services (ABS) is thrilled to announce that our CEO, Alejandro Pardiñas, has been appointed to the National Industrial Advisory Board at the Florida International University College of Engineering and Computing. This prestigious role allows him to contribute his extensive expertise in power transmission systems and engineering leadership to the Department of Mechanical & Materials Engineering (MME).

In his capacity as a board member, Alejandro will advise on curriculum enhancements and align educational practices with the evolving needs of the industry, ensuring that future engineers are well-prepared for the challenges of tomorrow. His involvement also underscores ABS's commitment to fostering educational excellence and supporting the next generation of engineering talent.

Alejandro's role will also provide ABS with unique insights into cutting-edge research and developments within the engineering sector, enhancing our company's capabilities and solidifying our position as a significant player in the industry. We are proud of his achievement and confident that his guidance will make a significant impact at FIU and beyond.
